County Wildlife Site
(Ref No: 65)

Site Name: Flordon Meadow (West) **Parish: Wreningham**

Grid Reference: TM 174980 **Area: 4.8 ha**

District: South Norfolk

Site Description:

This is predominantly an area of marshy grassland with small patches of well-drained unimproved meadow. A stream borders the site to the east.

The marshy grassland has a rank sward dominated by meadowsweet *Filipendula ulmaria* and yorkshire fog *Holcus lanatus* whilst well-drained areas are dominated by false oat-grass *Arrhenatherum elatius*, silverweed *Potentilla anserina* and nettle *Urtica dioica.* Gorse *Ulex europaeus* is scattered.

Species recorded by Norfolk Flora Group in 2016 include wild angelica *Angelica sylvestris,* marsh-marigold *Caltha palustris,* common spotted orchid *Dactylorhiza fuschii,* marsh bedstraw *Galium palsutre,* square-stalked St John's wort *Hypericum tetraperum,* meadow vetchling *Lathryus pratensis,* common hemp-nettle *Glaeopsis tetrahit agg.,* greater birds foot trefoil *Lotus pedunculatus,* bugloss *Anchusa arvensis* and weld *Reseda luteola.*
